Determination of Demand

EPB will meter the demands in kW of all customers having loads in excess of 50 kW. The metered demand for any month shall be:

- (a) the highest average load in kW during any 30-consecutive-minute period of the month
- (b) 85 percent of the load in kVA plus an additional 10 percent for that part of the load over 5,000 kVA
- (c) Not less than 30 percent of the higher of the currently effective contract demand or the highest billing demand established during the preceding 12 months

Minimum Bill

The monthly bill for GSA1 & GSA3 will not be less than the sum of

- (a) The customer charge,
- (b) The demand charge applied to the customer's billing demand,
- (c) The energy charge applied to the customer's energy usage

The monthly bill for GSA2 will not be less than sum of

- (a) The customer charge,
- (b) 20% multiplied by \$16.35 multiplied by the higher of the current effective contract demand or the highest billing demand established during the preceding 12 months

Seasonal Service

Customers may contract for service on a seasonal basis but are limited to 2,500 kW and shall pay the above charges plus an additional seasonal use charge:

GSA1: 1.03¢ per kWh per month

GSA2: 1.03¢ per kWh for the first 15,000 kWh per month and
\$3.09 per kW per month of billing demand in excess of 50 kW

GSA3: \$3.09 per kW per month of billing demand

Contract Requirement

EPB requires contracts for customers whose demand requirements exceed 1,000 kW, these contracts will be for an initial term of 1 year. The customer will contract for its maximum requirements, which will not exceed the amount of power capable of being used, and EPB is not be obligated to supply power in excess of the contracted demand.

Payment

Bills under this rate schedule will be rendered monthly. Any amount of the bill unpaid after the due date specified on the bill may be subject to additional charges under EPB's standard late-payment policy.

Single-Point Delivery

The charges under this rate schedule are based upon the supply of service through a single delivery and metering point at a single voltage.
